12G SDI Video to Fiber Converter

1-ch 12G-SDI+1-ch Loop+1-ch RS485 to Fiber Converter

Overview

The 12G-SDI HD audio and video optical converter is developed by AOA Technology, with independent intellectual property rights, combined with the actual demand of the market. through the single core optical fiber can transmit one channel forward 12G-SDI video and one channel reverse RS485 data / tally signal (optional), realizing no delay, uncompression and high quality signal extension of 20km.

The SDI video converter built-in serial clock recovery, signal equalization and line drive, input automatic detection signal 12G-SDI/6G-SDI/3G-SDI/HD-SDI/SDI/ASI, compatible with SMPTE2082-1 (12GUHD-SDI), ST2081-1 (6GUHD-SDI), SMPTE424M, SMPTE292M, SMPTE259M, SMPTE297M, SMPTE305M, SMPTE310M standards.

12G SDI to fiber optic converter supports plug-and-play SFP optical module, which can replace the corresponding optical module according to the actual site requirements, the device power consumption is less than 1.5W, the type-C port is used for power supply, supports USB power supply system, which is flexible in use.

The circuit board of 12G HD SDI to fiber converter adopts multi-layer design, stable and reliable, strong anti-interference ability; all components including connector, use products from internationally renowned manufacturers with reliable quality; aluminium shell design, corrosion resistance, excellent thermal and conductive function.

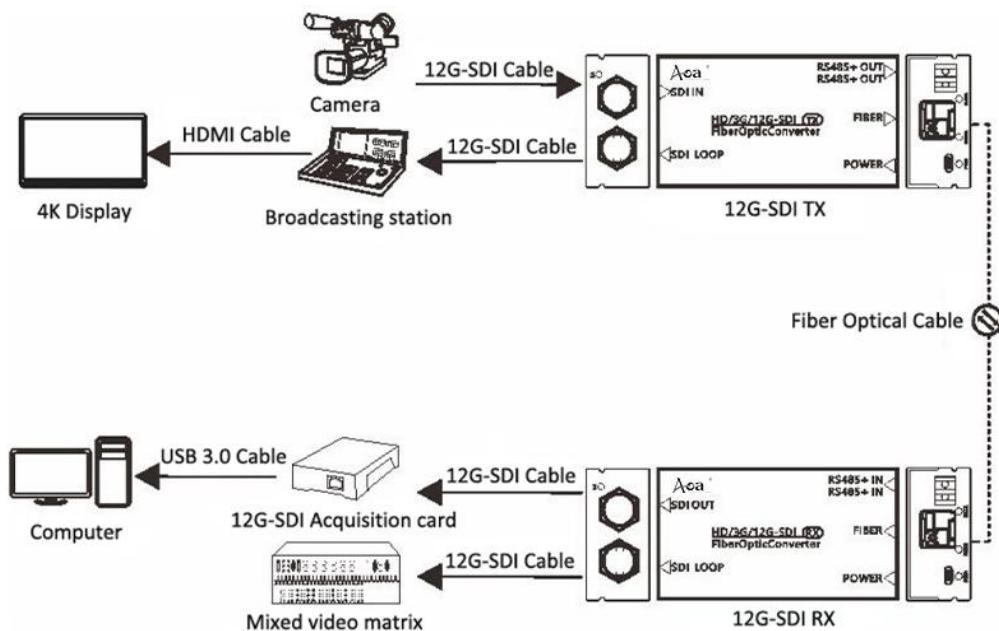

Features
